FIG. 20

FIG. 21 is a block diagram of a system for processing data to be transmitted over a radio link. The system includes a data source, a data processor, a data transmitter, and a data receiver. The data source provides data to the data processor, which processes the data and outputs it to the data transmitter. The data transmitter transmits the data over a radio link to the data receiver, which receives the data and outputs it to the data processor. The data processor also receives feedback from the data receiver and adjusts its processing accordingly.
